Yes, the results are also in the same spreadsheet as the Peromanon samples, no PFAS was found, but must be noted that again the spike recovery was low. **Ex. 5 Deliberative Process (DP)**

Let me know if you need me to resend the spreadsheet

Thanks  
Yan

Have you analyzed the containers and lids yet? Just checking. Since we didn't find any PFAS in the samples, I don't expect that we find PFAS in the containers

Thanks  
Thuy
